

**Office of Materials and Research
Qualified Products List**

The following is a list of fine aggregate sources established according to the requirements as set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements of Section 801.2.02 of the Standard Specifications. The sources listed have approved Quality Control Programs and materials they certify may be used in Portland cement concrete prior to project control tests unless non-uniform or non-specification materials are suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the Engineer to accept materials from the same source delivered later.

QPL-1

**Concrete Sand Sources
Section A "Standard Sources List"**

Pit and Quarry Control Branch

15 Kennedy Drive
Forest Park, GA 30297

Office Phone: 404-363-7630
Office Fax: 404-363-7684

FINE AGGREGATE SOURCES ARE RESTRICTED FROM USE IN THOSE CLASSES AND TYPES OF PORTLAND CEMENT CONCRETE IN WHICH MIX DESIGNS HAVE NOT BEEN ESTABLISHED AND/OR APPROVED BY THE OFFICE OF MATERIALS AND RESEARCH. ALL NATURAL SANDS (PRODUCT 10NS), EXCEPT WHERE NOTED, ARE RESTRICTED FROM BITUMINOUS APPLICATIONS EXCEPT WHERE LOCAL SANDS ARE ALLOWED.

For the purpose of this list, the descriptions listed under CHARACTER OF MATERIAL are very general.

NOTE 1: Group I sand is excluded from bridge deck concrete and Portland cement concrete paving because of aggregate polishing characteristics.

NOTE 2: Due to design or service record deficiencies, this source has been restricted from certain classes and types of Portland cement concrete. Verification of restrictions should be made through the Concrete Branch of the Office of Materials and Research prior to use.

NOTE 3: The Provisional Approved Status of this sand is "BLEND ONLY" which means it may be used only when blended with another material in such a manner as to produce a consistent final blend that meets all specification requirements for No. 10 concrete sand.

NOTE 4: This source is approved to supply a high fine content sand (Product 10FM) as well as standard manufactured sand (Product 10SM).

NOTE 5 This material may be used in bituminous mixes but shall be limited to no more than 20 percent of a mix, except where local sands are allowed.

NOTE 6 The Provisional Approved Status of this sand is "BLEND ONLY" which means it may be used only when blended with another material in such a manner as to produce a consistent final blend that meets all specification requirements for No. 10 concrete sand. This material shall not exceed 30% of a mix.

NOTE 7: Testing has shown this aggregate to be potentially alkali-silica reactive. Certain restrictions apply to its use in Portland cement concrete, and these restrictions must be verified by the Office of Materials and Research prior to use.

NOTE 8: This 10SM is produced by blending 50% crushed alluvial gravel with 50% of the 10NS from this source.

Office of Materials and Research
Qualified Products List

Following is the list of fine aggregate sources that are approved to supply aggregates for limited use only. This list was established according to the requirements set forth in Standard Operating Procedure No. 1, "Monitoring the Quality of Coarse and Fine Aggregates." These sources have proven their capability of meeting the requirements applicable to the products and uses that are listed below.	<div>QPL-1</div> <div>Fine Aggregate Sources</div> <div>Section B "Temporary Sources List"</div>		<div>Pit and Quarry Control Branch</div> <div>15 Kennedy Drive</div> <div>Forest Park, GA 30297</div> <div>Office Phone: 404-363-7630</div> <div>Office Fax: 404-363-7684</div>	
These listed sources have approved Quality Control Programs that are applicable to the products listed. The listed products may be certified by the producer and may be used prior to project control tests unless non-uniform or non-specification material is suspected. Section 106 of the Standard Specifications provides that the approval of preliminary samples does not obligate the Engineer to accept materials from the same source delivered later.				
For the purpose of this list, the descriptions under CHARACTER OF MATERIAL are very general.				
Producer and Location of Source	Source Number	Character of Material	Aggregate Group	Approved Products
<div>ALABAMA SAND & GRAVEL</div> <div>1565 County RD 24</div> <div>Billingsley, AL 36006</div> <div>205-755-9997</div>	129T	Alluvial Sand	II	Natural Sand (10NS) for use in precast concrete
